

# Ali Hameed S.Ridha

## Frontend Web Developer

### OBJECTIVE

create original, elegant, fast and scalable web applications for production level.

### EXPERIENCE

#### Mid-Level Frontend Web Developer at [Al-Jad Ltd](#)

**From 2022/8 to currently in there (present - 4 months)**

Responsible for managing and maintaining two enterprise projects published live in production using a wide variety of modern web technologies including: React.js, Redux.js, Node.js and typescript.

#### Frontend Web Developer (Freelance)

**From 2022/2 to 2022/10 (8 months)**

I my early times in the tech market i have work on several freelance projects including: A Gold Trading platform called Golden Express and a -menu project for Cima restaurant, throw that time i have worked using the following technologies: React.js, Next.js, TailwindCSS, Bootstrap 5, Material UI.

#### Frontend Web Developer at [Ridefly](#)

**From 2022/1 to 2021/5 (5 months)**

At this company i worked as a freelancer, developing the their digital product using the best frontend tech stack in the market which is React.js and Next.js and also worked on fixing integration problems with third party services like Zain cash payment gateway and Kplus (international flight booking service based in Turkey) also worked on developing the admin panel also built by using the same frontend tech stack.

#### Sales Officer at Matbaje

**From 2021/2 to 2021/9 (8 months)**

at this company i started as junior photoshop designer and then I moved to a higher position to become an Operation manager. It wasn't a tech related job but during my time in it, I've learnt a lot about business related skills and how to deal and manage the business with professional workers to achieve business goals and needs.

## PROJECTS

### **Food buzzer** [Github link](#) [Live Preview](#)

This is my graduation project from FikraCamp and the whole idea of this project is to solve the problem of the lack of using the food-buzzer in our restaurant so we build this E-buzzer version of it, the main idea was to notify users when the food is ready at the cashier throw the internet and it will solve a real problem in our restaurant.

## COURSES & HACKATHONS

- FikraCamp v2 web development bootcamp.
- Project1 Frontend Web Development bootcamp.
- Yanhad Hackathon for finance & online-payment issues.
